## *The Peace Park concept*

Is based on the belief that the collaboration of bordering nations to **share in the management of the natural areas that lie between them**, promotes **peaceful relations** between these nations.

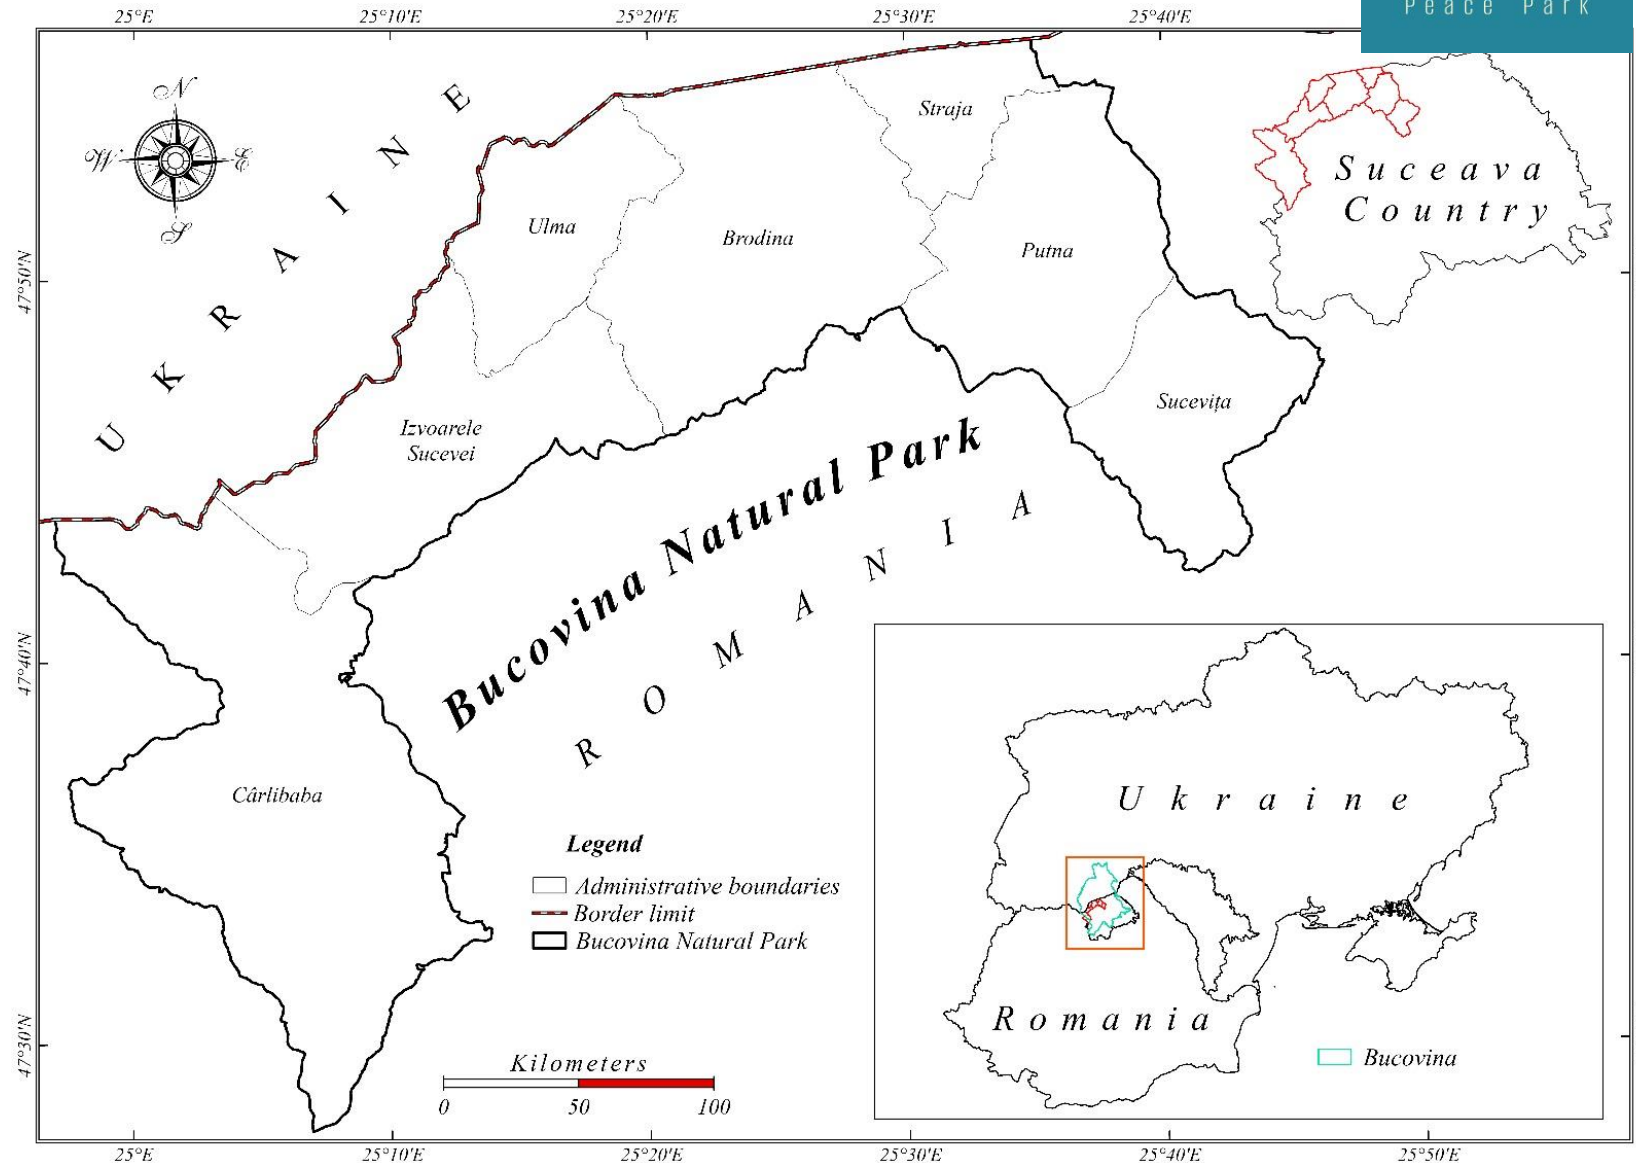

At the end of the Cold War, there was a realization that we could consider ways of **using ecology for peacebuilding** through a series of transboundary conservation areas.

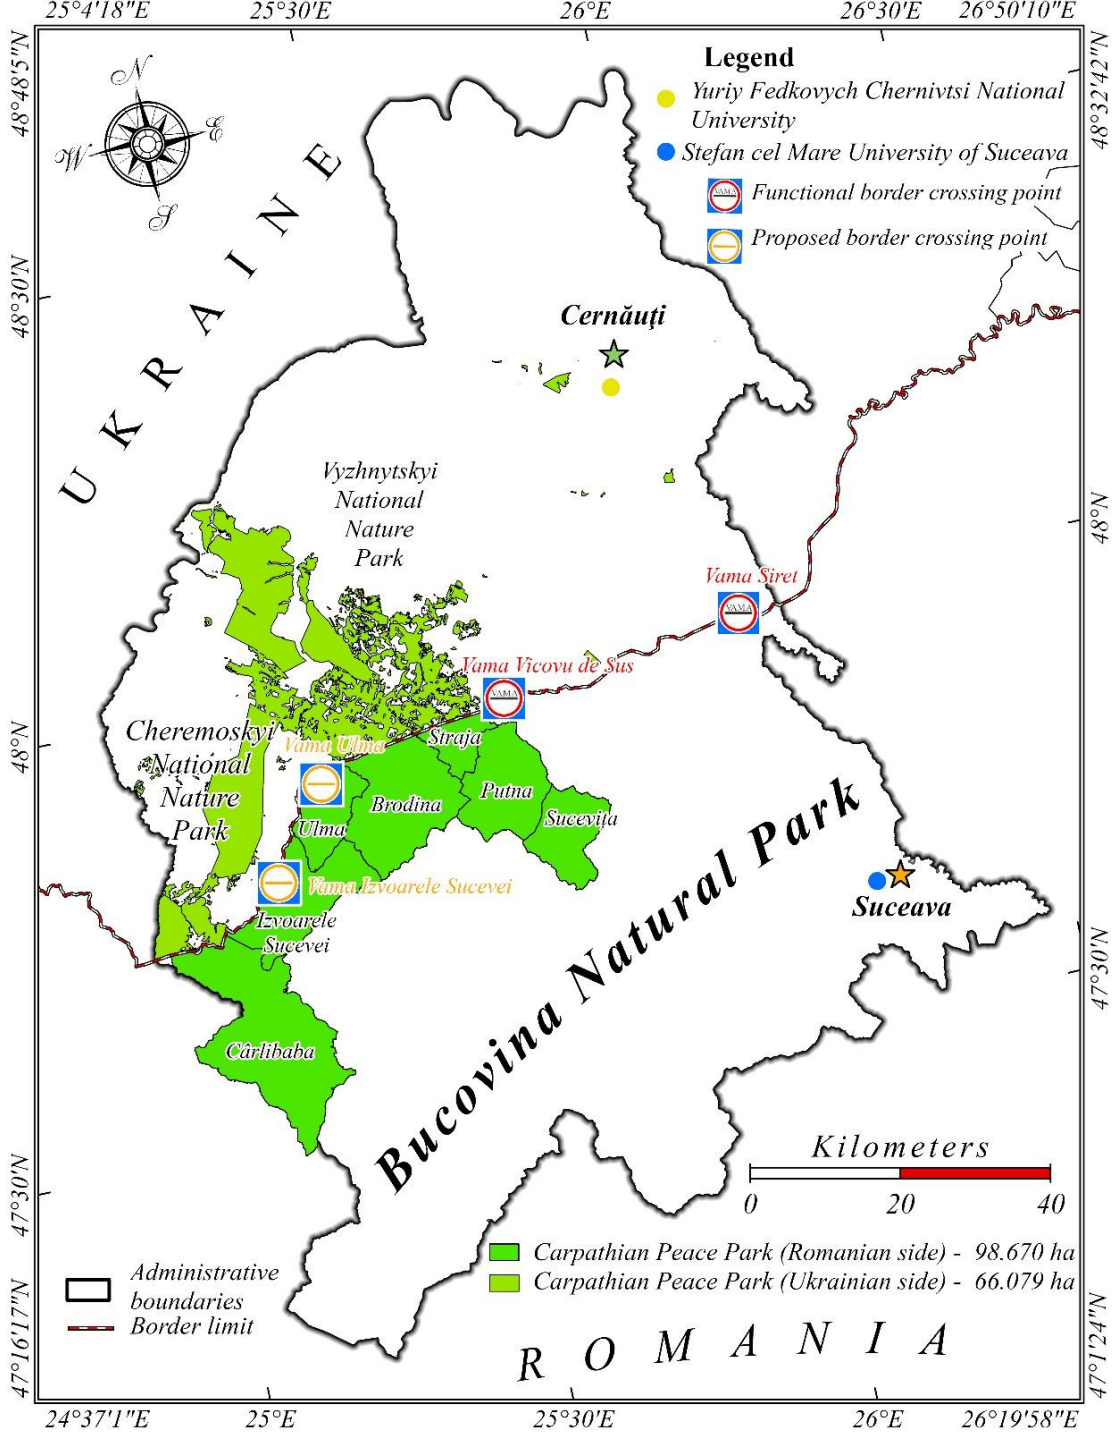

This presentation will consider how we might move to the next step of using such zones instrumentally for **peace-building** through the much more deliberate notion of "Peace Parks".

# Bucovina Natural Park

The **first phase** in the establishment of the cross-border Carpathian Peace Park framework we are proposing through this initiative is the formation of a national protected area at the northern border of Romania in the medium-elevation mountainous area of Suceava county:

**Bucovina Natural Park.**

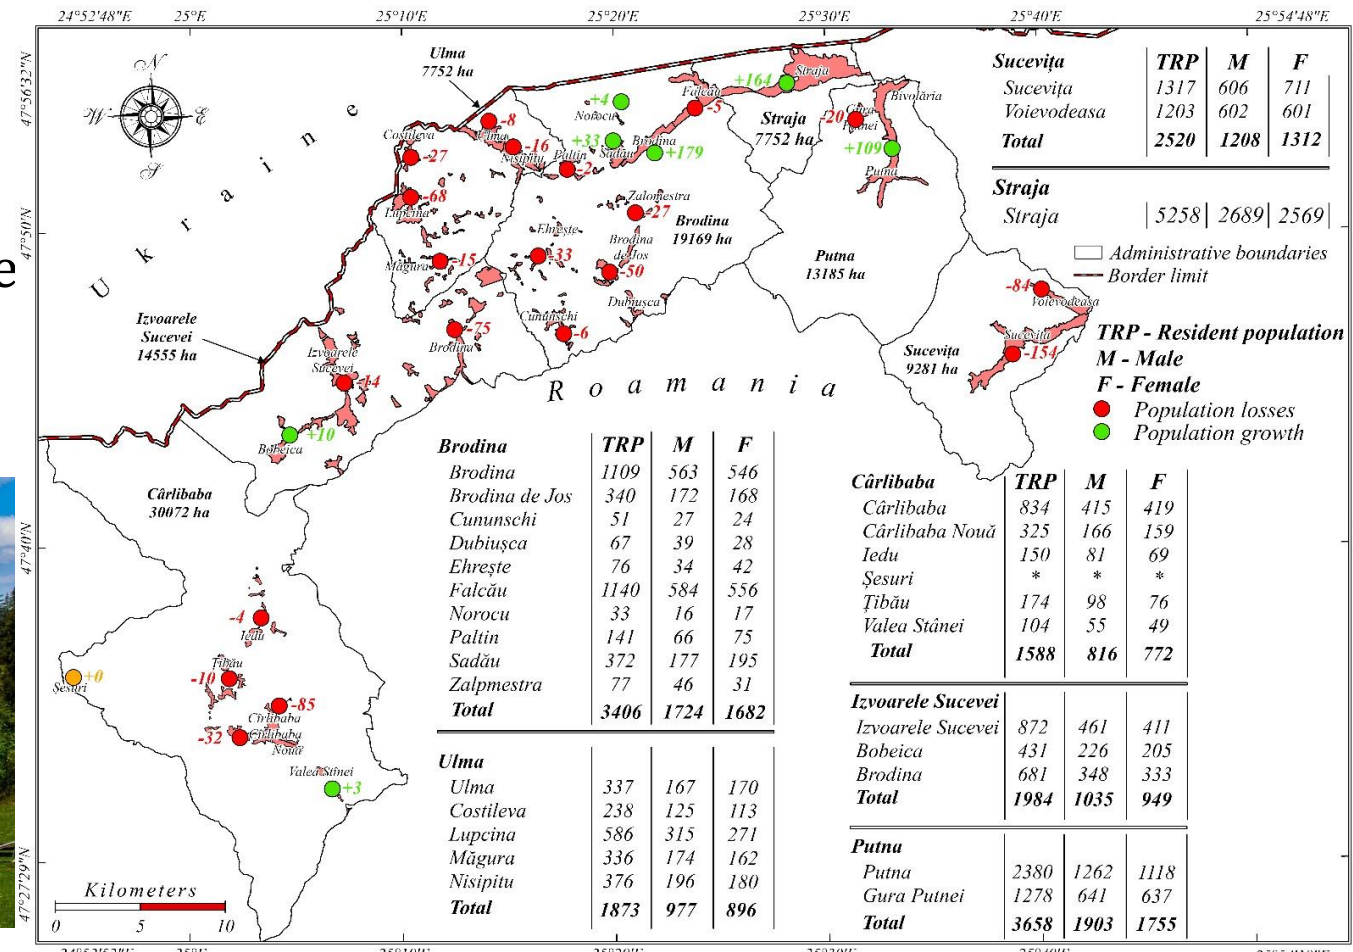

# Carpathian Peace Park

Along with the existing national parks located near the RO-UA border in Ukraine - **Cheremosh National Nature Park** and - **National Nature Park "Vyzhnytskyi"**, Bucovina Natural Park will form the cross-border **Carpathian Peace Park**.

# The RO – UA border in Suceava county (Bucovina)

Separates some of the **most deprived communities in Romania (and in the EU)**, due to spatial isolation and remoteness, the limitations imposed by the state border (still perceived as the border of the former USSR) and the lack of resources allotted for the development of this region, leading to massive **outbound migration and depopulation of mountain villages.**

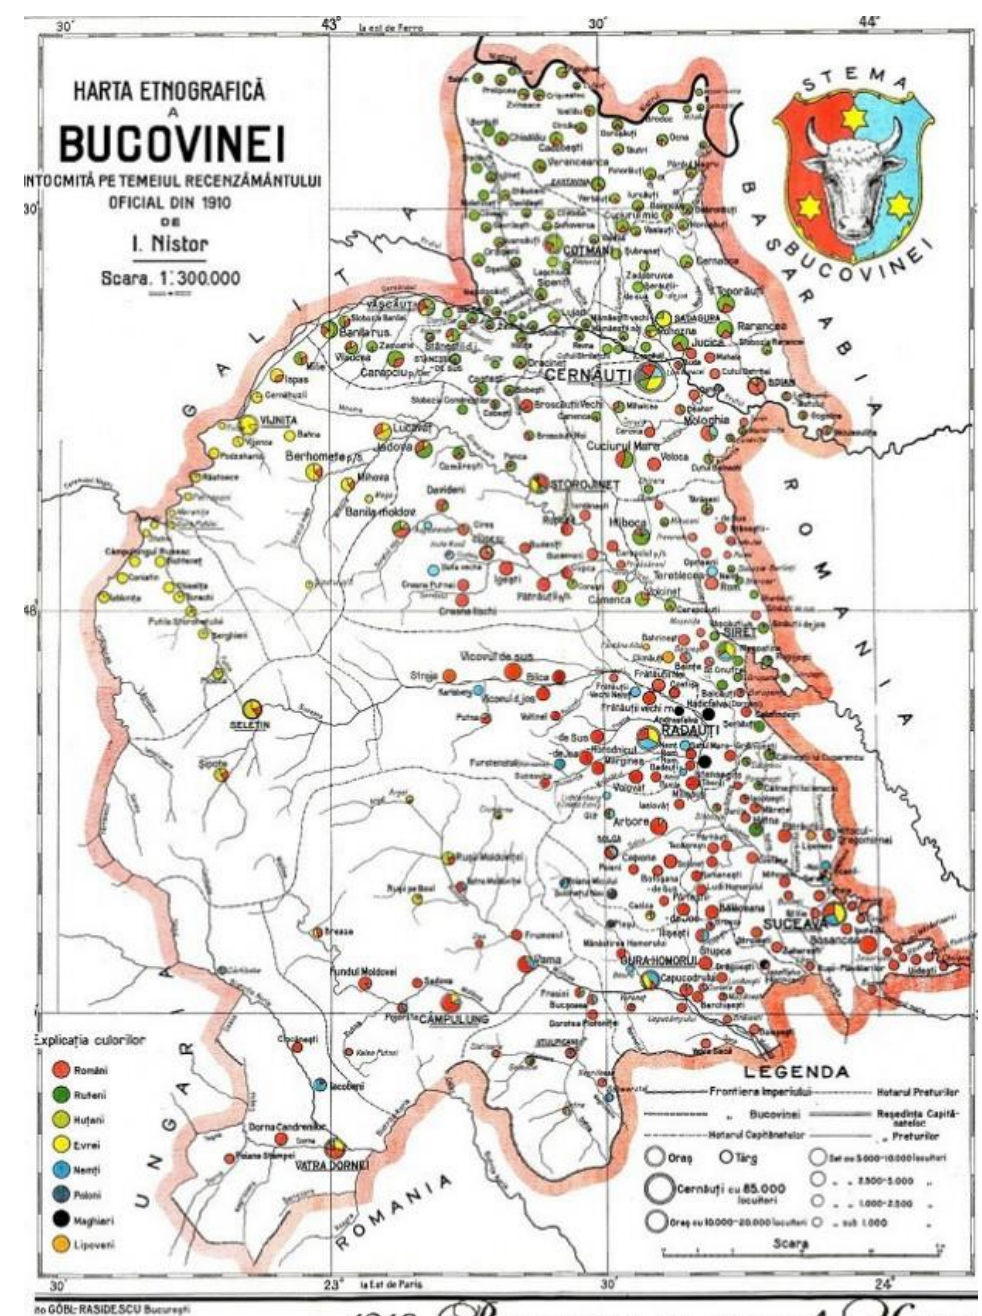

# Historical and ethnic-linguistic context of Bucovina

During the time of the **Duchy of Bukovina (1775-1918)**, this region saw peaceful cohabitation between **multiple ethnic and/or linguistic groups** of people: **Romanians, Ukrainians/ Hutsuls/Ruthenians, Jews, Germans, Poles, Hungarians, Lipovans/Russians, Slovaks Roma** etc.

However, the Soviet invasion of 1941 and WWII split Bucovina in two parts, with the northern half incorporated in the USSR and the southern half as a part of Romania, **dividing villages, communities and families for several decades.**

During the conflict and in its aftermath some ethnic and linguistic groups that were previously well represented **have nearly disappeared, such as the population of Jewish and German ethnicities, while others diminished severely.**

Basarabia-Bucovina.Infa

# Biogeographical potential of Bucovina

The region is covered with forest to a considerable extent and no major problems with illegal logging have been reported.

Coniferous, mixed and broad-leaved forests cover **ca. 70% of the area.**

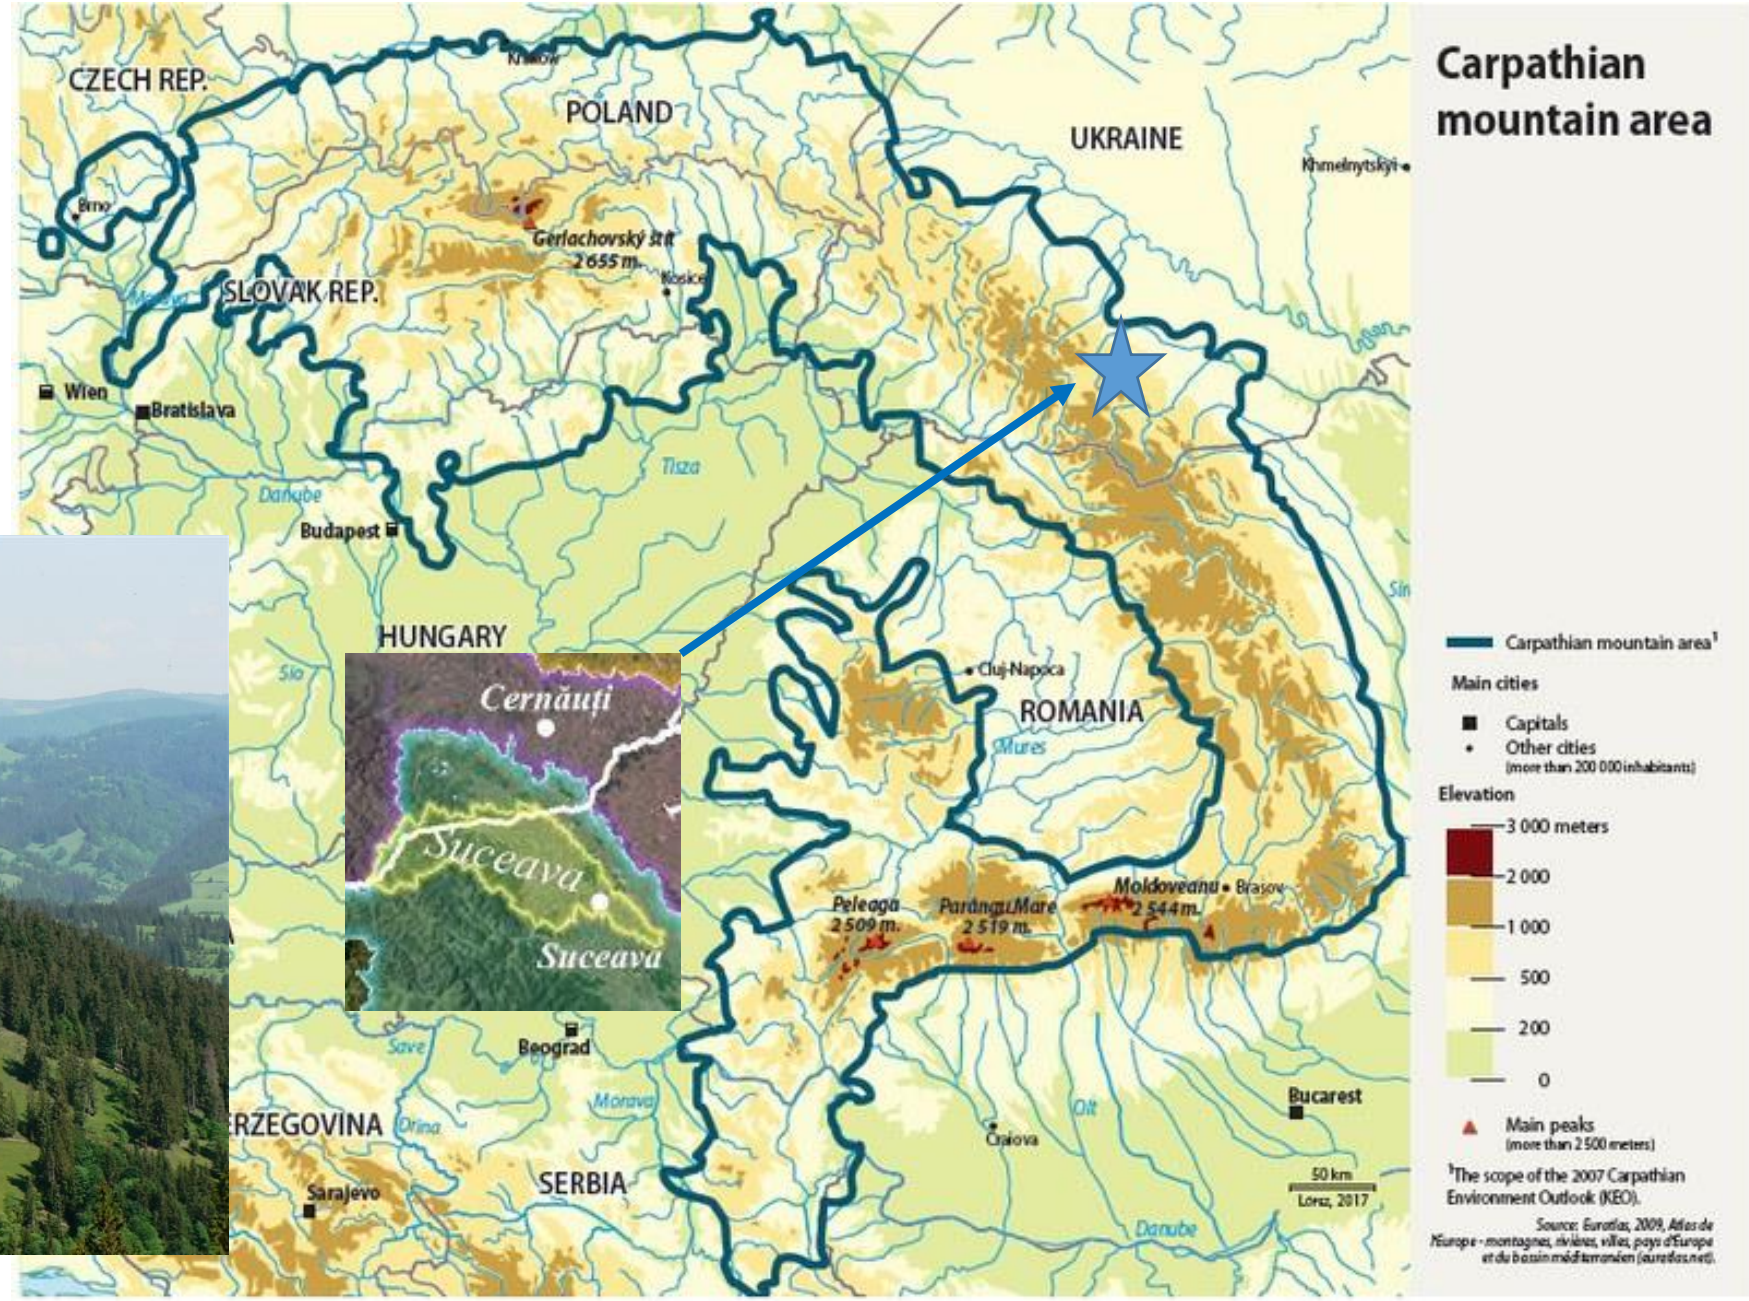

Forest management is much more effective compared to other areas along the border with Ukraine.

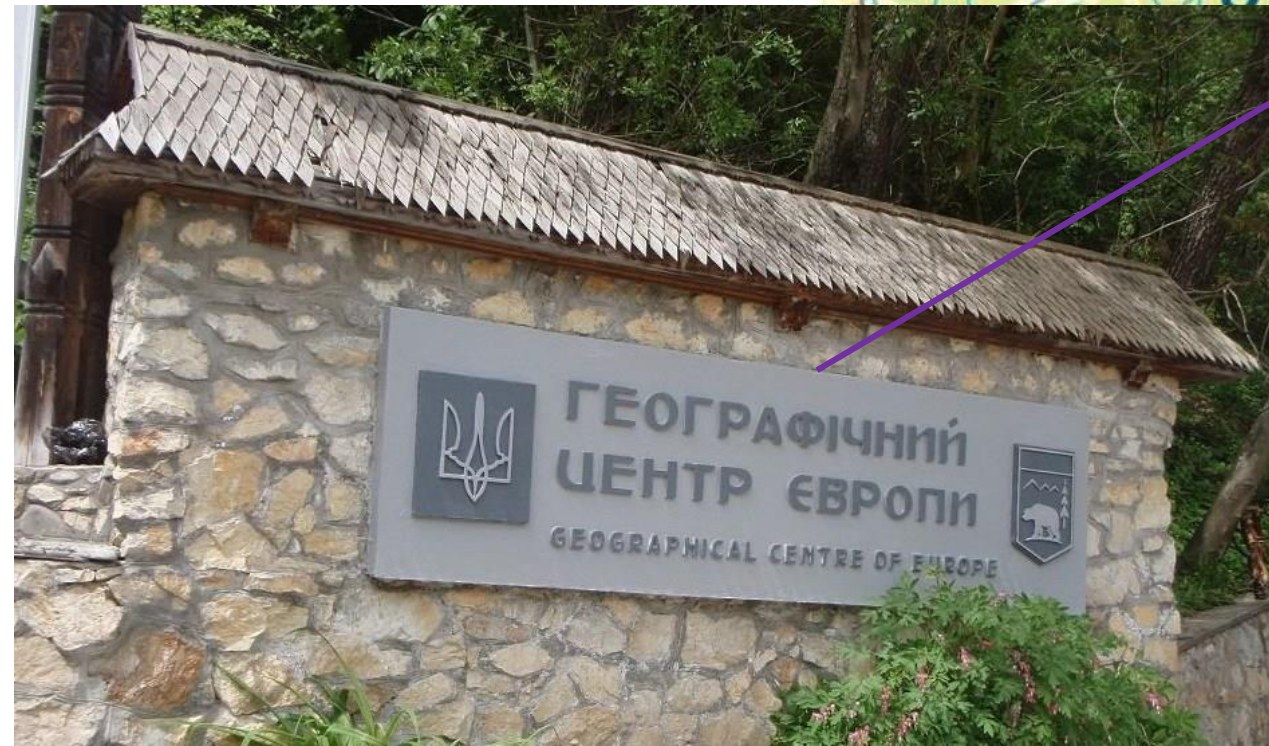

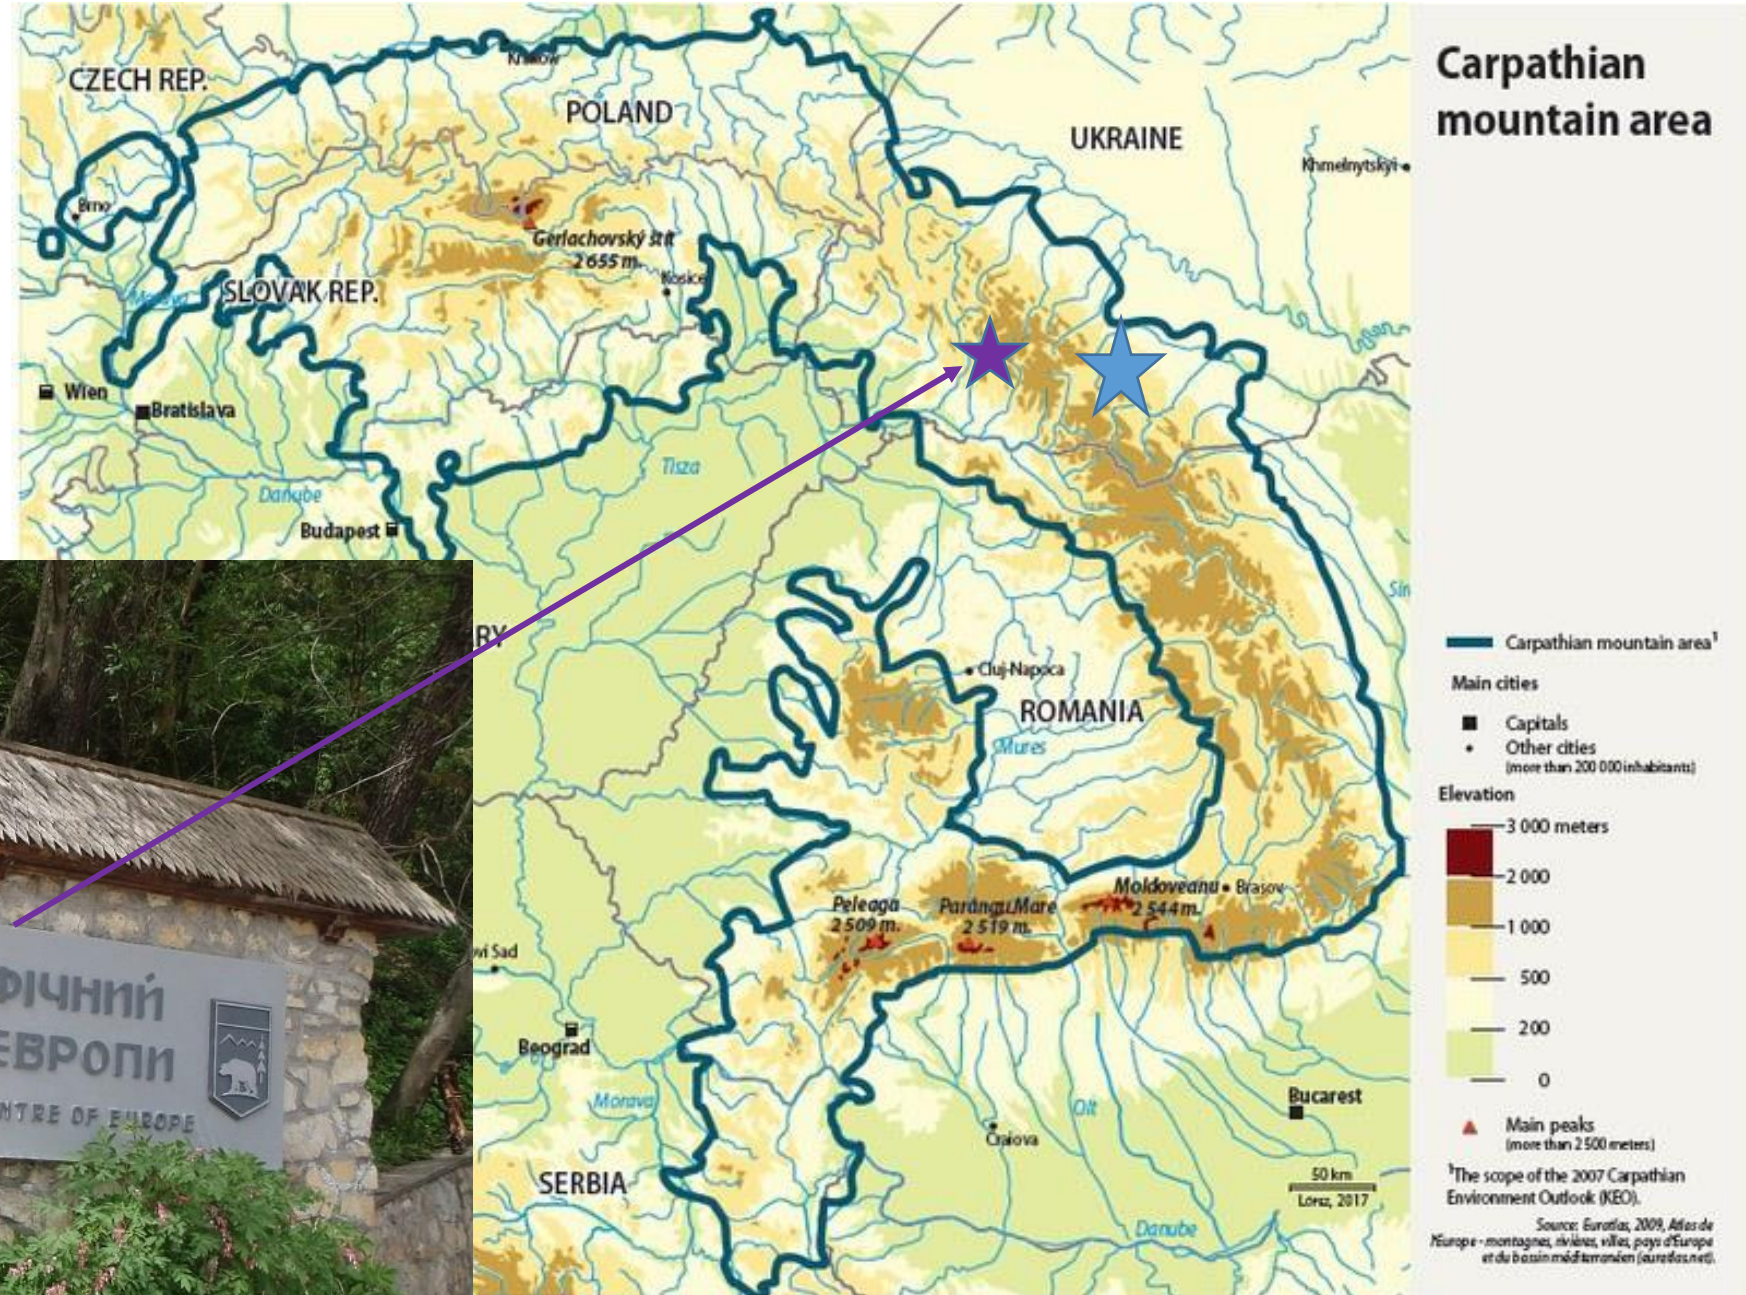

# Geographical context

Location in the central area of the Carpathian Range.

# Geographical context

Location near the geographical center of the European continent.

## Hydrographical context

Romania and Ukraine share several major drainage basins:

- Tisa River
- Siret River (including **Suceava r.**)
- Prut River
- Danube River
- Danube Delta
- Black Sea

# *A history of environmental conflict between Romania and Ukraine*

The management of **Bastroe Channel** sparked **tensions between Romania and Ukraine** (which share the Danube Delta) and drew criticism from the European Union and environmental groups, who believe it could harm this unique ecosystem, a UNESCO World Heritage site since 1991.

## *A history of environmental conflict between Romania and Ukraine*

The **Snake Island dispute** was a conflict between the two countries about legitimate access to resources in the Black Sea.

Romania and Ukraine have solved a 40-year-old border dispute over a large petrol and gas-rich area of the Black Sea, at the International Court of Justice of the UN.

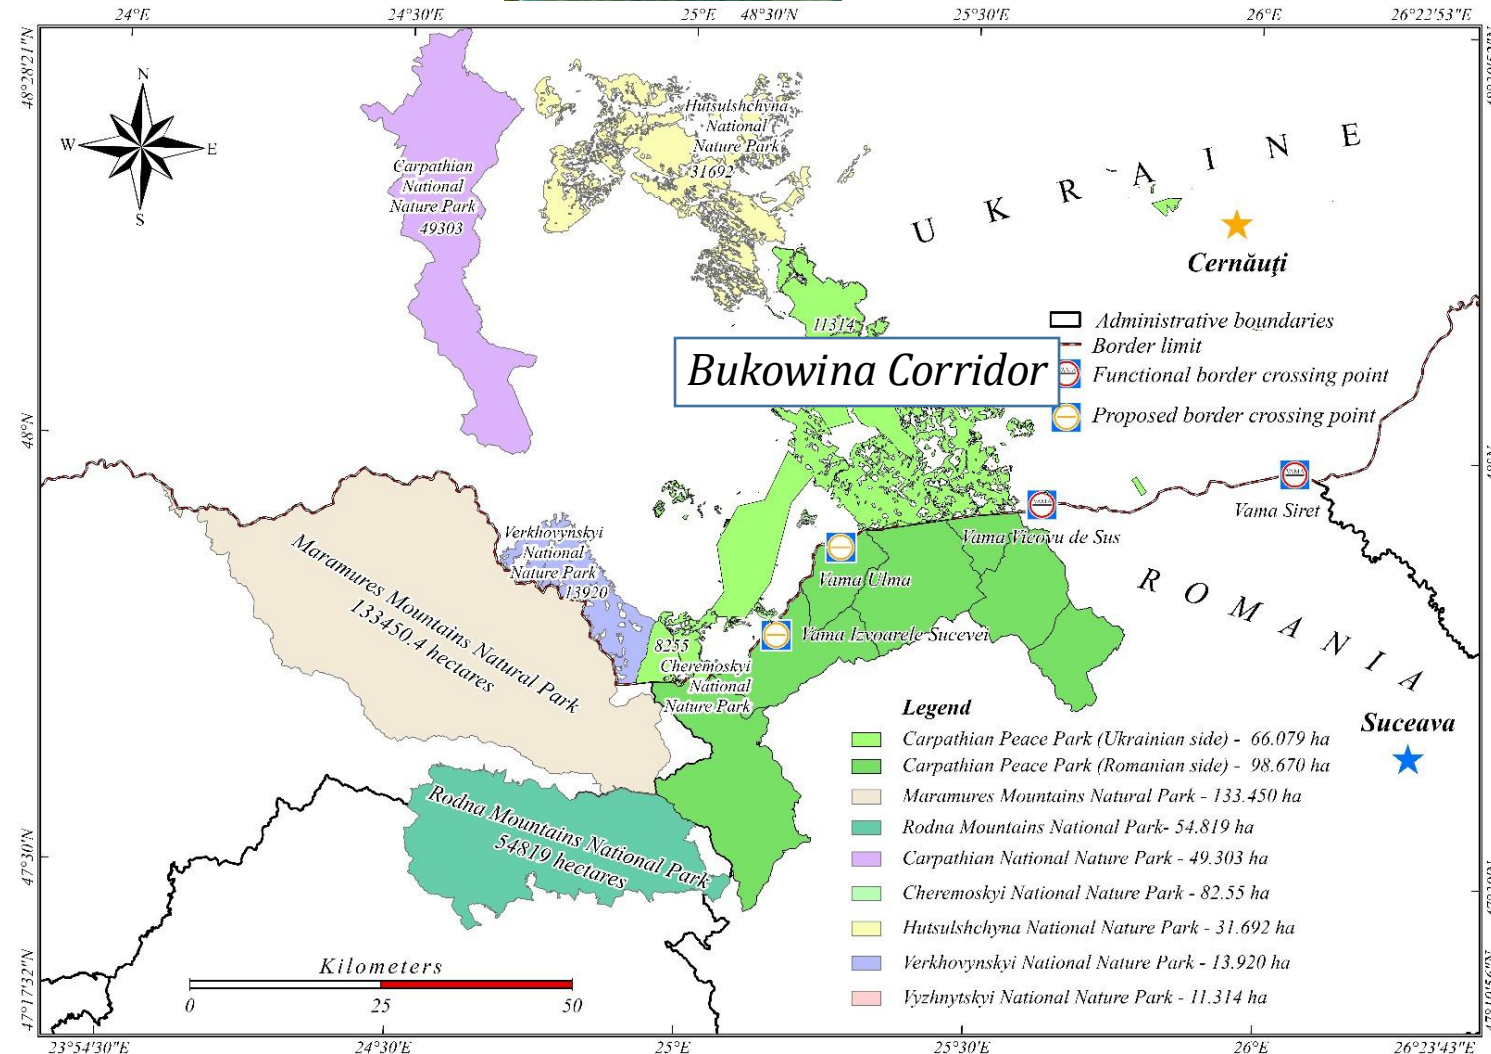

# The Carpathian Peace Park

**Bucovina Natural Park**, the Romanian part of the **Carpathian Peace Park**, will include the **upper basin of the Suceava river** and will extend along the Eastern Carpathians over a distance of about 70 km, between Vicovu de Sus (Romania) to the east and Sarata (Ukraine) to the west.

On the **Romanian side**, we propose that Bucovina Natural Park will cover an area of ca. **100.000 ha**, including the communes of Sucevita, Putna, Straja, Brodina, Ulma, Izvoarele Sucevei and Cârlibaba.

On the **Ukrainian side** the **Carpathian Peace Park** will comprise two existing parks: **Nature Park "Vyzhnytskyi"** and **Cheremosh National Nature Park**, as well as the so-called **Bukowina Corridor**, which cover a total area of up to **70.000 ha**, and will connect these protected areas to **Bucovina Natural Park** in Romania.

# *The Carpathian Peace Park*

**Will play an important role in:**

- i) maintaining and improving **bilateral relations** between Ukraine and Romania;
- ii) creating a **climate of peace and cooperation for managing resources** as well as for controlling illegal activities in the cross-border area (e.g. cigarette smuggling and trafficking);
- iii) **preserving the natural heritage and biodiversity**, while increasing or maintaining the areas covered by forest ecosystems, which are critical actions in the context of current and upcoming climate and environmental changes;
- iv) **bringing out of isolation a territory** that once represented a model for successful regional development and for peaceful cohabitation between multiple ethnic groups;
- v) **protecting the unique architectural and cultural heritage of all ethnic communities**, and particularly of the **Hutsul population** living on both sides of the border.

# *The Carpathian Peace Park*

In the period that will follow the end of the conflict in Ukraine (**the post-conflict European era**), the Carpathian Peace park initiative could be **a model of environmental diplomacy** that will lead to long-term peace and reconciliation and to better collaboration in protecting the environment and managing regional resources in a sustainable manner.

Other fields which could benefit from this initiative include **developing tourist infrastructure, economic partnerships, academic exchanges and joint scientific contributions.**

The cross-border Peace Park has the potential to set **an example of good practice for other countries in Eastern Europe that have gone through totalitarian regimes, political and military conflicts, and overall underdevelopment and environmental neglect.**

Most of all, the Carpathian Peace Park will be **a free space where respect is granted for people of all ethnicities and for biodiversity.**

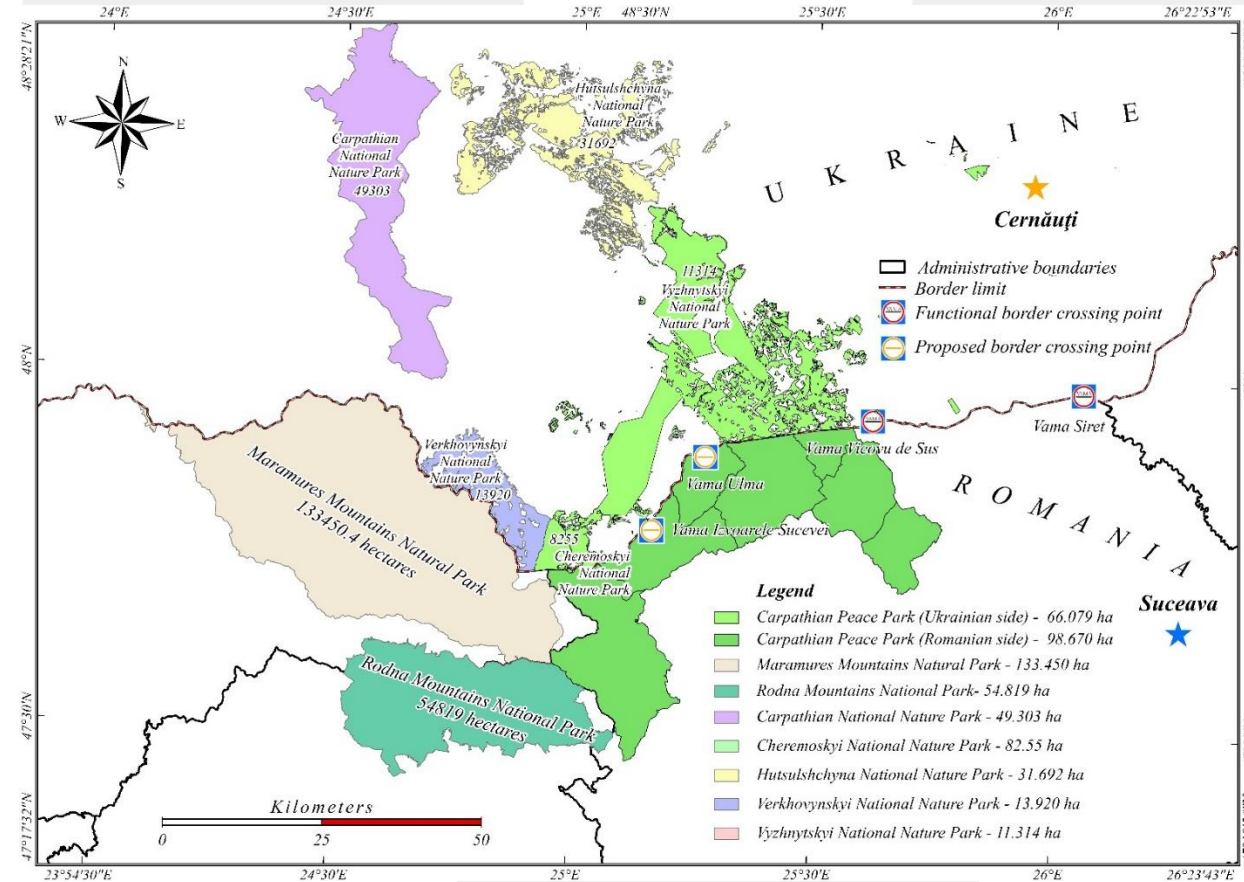

*Thank you!*

# *“The Carpathian Peace Park would build on a long history of successful trans-boundary protected areas in the Carpathians”*

East Carpathian Biosphere Reserve

WWF workshop in 2015 exploring options for transboundary protected areas linking Ukraine and Romania

*“The Peace Park proposal is consistent with recommendations of the recent Climate Risks and Adaptation Assessment for Carpathian Forests”*

## Key Recommendations:

- **Forest restoration and reforestation:**  
*Diversifying landscapes to reduce disturbance risks*
- **Protecting and conserving natural forests:**  
*Establishing and effectively managing protected areas, national parks, and nature reserves*
- **Enhancing forest landscape connectivity:**  
*Allowing species to migrate and adapt to changing climate conditions*

Carpathian Convention COP7  
11-13 October 2023, Belgrade, Serbia

*“Romanian old and primary forests are of continental and global importance*

*They are universally considered High Conservation Value Forests*

*Transboundary protected areas networks help sustain these systems”*
